CAO, HO V

**Identification Information**

**Patient:** CAO, HO V

**MRN:** 2020530

**DOB:**

2/1/1943

**Date of Service: 7/31/2023**

**Completed Date: 7/31/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley, NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Facilitation of motion needed for proper execution of thera ex of R LE while sitting and PRE tolerated on L LE using 2 lbs ankle weight to correct mm imbalance.

**97112** 97112: Static standing with support onto parallel bars tolerated ~ 2 mins at a time and extensive assist necessary for proper alignment of spine and stability.

**97530** 97530: Px received training on bed mobility and sit to stand and stand to sit transition and extensive assist provided for safe completion of tasks.

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 121/80; Heart Rate at Rest = 70 beats/min

**Response to Tx** Response to Treatment: Fair. Px was encouraged to assume w/c sitting as tolerated and was endorsed to nsg.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/o attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/o attempts to initiate; Sit --> Supine = Total Dependence w/o attempts to initiate

**Transfers** Transfers = Total Dependence w/o attempts to initiate; Sit --> Stand = Total Dependence w/o attempts to initiate; Bed = Total Dependence w/o attempts to initiate; W/C = Total Dependence w/o attempts to initiate

**Gait** Level Surfaces = DNT; Uneven Surfaces = DNT

**Other Areas** Stairs = DNT

**Sitting Balance** Static Sitting = Poor+; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = Poor; Dynamic Standing = Poor

CAO, HO V

**Identification Information**

**Patient:** CAO, HO V

**MRN:** 2020530

**DOB:**

2/1/1943

**Date of Service: 7/30/2023**

**Completed Date: 7/30/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley. NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Seated LLE AROM ther-ex in all available planes against gravity for muscle strengthening and endurance to promote functional transfers and mobility. Seated RLE PROM in all available planes to promote circulation, improve joint extensibility, facilitate motor recruitment, and to prevent contractures.

**97112** 97112: Static sitting balance with LUE support on bed rail with emphasis on upright posture to promote sitting tolerance and stability. Dynamic sitting balance with back support from therapist with emphasis on anterior weight shifting to promote trunk control to carry over to sitting and standing stability. Static standing balance LUE support on // bars with emphasis on align COM over BOS, upright posture and maintaining B knee extension to promote standing tolerance and stability. Progressed to lateral weight shifting to promote proprioception in RLE to carry over to gait training.

**97530** 97530: Therapeutic Activities: bed mobility activities to increase functional skills, training in rolling, scooting, bridging to facilitate (I) bed mobility and EOB to W/C hoyer transfer training to increase functional task performance. Training in safe sit to stand/stand to sit mobility.

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 132/83; Heart Rate at Rest = 66 beats/min

**Response to Tx** Response to Treatment: Pt. tolerated treatment well and participated in all activities without complications. Pt. tolerated 3 sit to stands with LUE pull up on // bars into 30-60 sec of standing however constant cueing for upright posture with forward gaze and righting to midline due to a slight R lean. Pt. required blocking of R knee during standing weight shifting to prevent knee buckling. Pt. left seated in W/C and endorsed to activities at end of session.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/o attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/o attempts to initiate; Sit --> Supine = Total Dependence w/o attempts to initiate

**Transfers** Transfers = Total Dependence w/o attempts to initiate; Sit --> Stand = Total Dependence w/attempts to initiate; Bed = Total Dependence w/o attempts to initiate; W/C = Total Dependence w/o attempts to initiate

**Gait** Level Surfaces = DNT; Uneven Surfaces = DNT

**Other Areas** Stairs = DNT

**Sitting Balance** Static Sitting = Poor+; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = Poor; Dynamic Standing = Poor

**Completed Date: 7/29/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley. NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97112** 97112: Pt tolerated PROM for RLE in supine using PNF technique with hip abd/add, flexion, extension, and knee flexion/extension. He was able to move through full ROM, no spasticity noted.

**97530** 97530: Pt was TD for squat pivot transfer from bed to WC. He performed 6x STS with L hand on hallway rail, TD+. Noted multiple repetitions of hip and knee extension for upright posture in standing. He tolerated 10-45s of standing with sustained, contraction of posterior chain. Therapist provide contact block on RLE.

**Response to Tx** Response to Treatment: Pt is progressing appropriately with therapy. He demo improved standing tolerance today, able to continue to count as he was standing up. He left in WC with tray table in activity room, remained sitting up for 2 hrs.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/o attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/o attempts to initiate; Sit --> Supine = Total Dependence w/o attempts to initiate

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: LLE AROM Ex and RLE PROM Ex in sitting for strengthening; hamstrings and calves stretching Ex for flexibility.

**97112** 97112: Sitting supported A/P and lateral weight shifts, LUE forward and lateral reaching to improve trunk control and sitting balance.

**97530** 97530: TD+ (2 person) pull sit <-> stand using left hallway rail, Pt tolerated static standing x30-60 sec each time, 2 reps, MAX V/T cueing for compensatory leaning on the wall and upright posture awareness.

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 133/79; Heart Rate at Rest = 76 beats/min

**Response to Tx** Response to Treatment: GOOD. Received Pt up in w/c, Pt session focused on trunk control and balance Ex, LUE pull sit to stand and static standing compensatory leaning on wall, Pt was able to maintain static standing with constant v/t cueing. Pt remained up in w/c after PT, endorsed to family member.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/o attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/o attempts to initiate; Sit --> Supine = Total Dependence w/o attempts to initiate

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Px performed strength training of L LE and PROME on R LE while sitting on w/c and adequate rest breaks provided in between ex.

**97112** 97112: Trunk mobility ex done while sitting on w/c promoting trunk control and proper alignment of spine and px showed initiation on postural adjustment. Px assumes inc lateral trunk lean when LOB encountered.

**97530** 97530: Px received training on sit to stand and stand to sit while bilaterally supporting onto parallel bars and tolerated upright position ~ 20 sec at a time.

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 143/86; Heart Rate at Rest = 71 beats/min

**Response to Tx** Response to Treatment: Good. Px received meds for pain mgt prior to tx session. Px was encouraged to assume w/c sitting as tolerated and was endorsed to nsg.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/o attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/o attempts to initiate; Sit --> Supine = Total Dependence w/o attempts to initiate

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Pt performed seated BLE PROM in all planes to increase musculature facilitation, joint mobility, blood circulation, and flexibility.

**97112** 97112: Pt performed static sitting at EOB to increase facilitate trunk musculature, upright posture with BUE support, proprioception, and safety awareness.

**97530** 97530: Pt performed bed mobility to practicing rolling and scooting sequence to complete supine to sit transfer to EOB.

**Response to Tx** Response to Treatment: Pt agreed to participate in therapy. Pt able to initiate BUE reach to initiate rolling, but required max assist to R side and mod assist to the L side. Pt required TD+ assist during supine to sit to EOB and sit to stand to W/C. Pt tolerated therex in W/C well. Pt left in W/C in activities room after tx.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate (L rolling (MAX); R rolling (MOD)); Rolling = Max (A); Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Transfers** Transfers = Total Dependence w/attempts to initiate; Sit --> Stand = DNT; Bed = DNT; W/C = DNT

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Pt performed seated LLE AROM and RLE PROM in all planes to increase musculature facilitation, endurance, flexibility, and joint mobility to promote stability in WB stance activities such as static standing.

**97112** 97112: Pt performed static sitting at EOB to increase upright posture with BUE support, facilitation of trunk stabilizers, proprioception, and reduce utilizing compensatory musculature.

**97530** 97530: Pt performed bed mobility to practice proper foot and hand placement during scooting, rolling, and pushing off technique to complete supine to sit and sit to supine safely.

**Response to Tx** Response to Treatment: Pt agreed to participate in therapy. Pt able complete therapy with no c/o pain and minimal rest breaks. Pt had difficulty maintaining upright posture with RUE>LUE due to weakness and required mod assist. Pt required TD+ assist to complete supine to sit and sit to supine transfer. Pt left in bed with needs within reach after tx. Measure BP 121/75.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate; Rolling = Max (A); Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Physical Therapy  
Treatment Encounter Note(s)**

Provider: The Pavilion at Sunny Hills

CAO, HO V

**Identification Information**

**Patient:** CAO, HO V

**MRN:** 2020530

**DOB:**

2/1/1943

**Date of Service: 7/19/2023**

**Completed Date: 7/20/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley. NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97112** 97112: Px performed functional tasks done while sitting at EOB and px was educated on proper body mechanics and extensive assistance necessary to safely maintain alignment and stability.

**97530** 97530: Px received training on bed mobility and transfer from bed to w/c and px was educated on proper sequencing and facilitation of motion needed to improve initiation and participation when transitioning from supine to sidelying. Use of Hoyer lift done for safe transfers and proper w/c positioning done to improve alignment of spine d/t R lateral trunk lean.

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 127/79; Heart Rate at Rest = 56 beats/min

**Response to Tx** Response to Treatment: Fair. Px was encouraged to assume w/c sitting as tolerated and was endorsed to nsg.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Transfers** Transfers = Total Dependence w/o attempts to initiate; Sit --> Stand = Total Dependence w/o attempts to initiate; Bed = Total Dependence w/o attempts to initiate; W/C = Total Dependence w/o attempts to initiate

**Sitting Balance** Static Sitting = Fair-; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = Poor; Dynamic Standing = Poor

**Patient:** CAO, HO V

**MRN:** 2020530

**DOB:**

2/1/1943

**Date of Service: 7/18/2023**

**Completed Date: 7/18/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley. NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: Px performed PRE of L LE using 2 lbs ankle weight and facilitation of motion needed when completing thera ex on R LE.

**97112** 97112: Functional reaching performed and facilitated while sitting on w/c promoting trunk control and alignment of spine while reaching across midline and outside BOS.

**97530** 97530: Px received training on bed mobility and transfer from bed to w/c and extensive assist necessary for safe completion of tasks. 2 person assist provided to safely complete sit to stand transitions while unilaterally supporting onto parallel bar.

**Response to Tx** Response to Treatment: Fair. Px was encouraged to assume w/c sitting as tolerated and was endorsed to nsg.

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Transfers** Transfers = Total Dependence w/o attempts to initiate; Sit --> Stand = Total Dependence w/attempts to initiate; Bed = Total Dependence w/o attempts to initiate; W/C = Total Dependence w/o attempts to initiate

**Sitting Balance** Static Sitting = Fair-; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = Poor; Dynamic Standing = Poor

CAO, HO V

**Identification Information**

**Patient:** CAO, HO V

**MRN:** 2020530

**DOB:**

2/1/1943

**Date of Service: 7/17/2023**

**Completed Date: 7/17/2023**

**Summary of Daily Skilled Services**

**Precautions** Precautions: Fall risk. Check vitals. (+) foley. NTL/Puree. Coordinate with OT. Sling for OOB activities. lap tray for the RIGHT UE. Please have hoyer sling in w/c. Likes to go by "Sam"

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97112** 97112: Promotion of motor return with supine ROM of the RIGHT LE in D1 pattern. Promotion of WB to RIGHT LE and RIGHT UE with anterior weight shifting on the RIGHT while sitting at EOB. Trunk control and balance training to promote midline sitting due to patient tendency for posterolateral trunk lean. Patient was able to tolerate sitting up for 20 mins at EOB

**CardioPulmonary Function** BP at Rest (Systolic/Diastolic): 119/66; Heart Rate at Rest = 58 beats/min; O2 Sats = 94; BP with Activity (Systolic/Diastolic): 116/68; O2 Sats = 95

**Response to Tx** Response to Treatment: Patient agreeable to session. Patient did not report pain nor dizziness during session. Patient returned to bed and positioned for comfort

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate; Rolling = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Sitting Balance** Static Sitting = Fair-; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = DNT; Dynamic Standing = DNT

**Pain Assessment** Pain = No pain present, per patient verbal and nonverbal communication

**97110** 97110: B LEs ther ex to tolerance facilitating muscle contraction throughout ROM.

**97112** 97112: postural control, techniques to facilitate motor control, gross motor coordination techniques and techniques to facilitate proprioception.

**97530** 97530: Therapeutic Activities: gross motor coordination, techniques to facilitate proprioception, facilitation of position in space, facilitation of postural control and strengthening activities to increase functional task performance.

**Response to Tx** Response to Treatment: Fair+

**Functional Status as a Result of Skilled Interventions**

**Bed Mobility** Bed Mobility = Total Dependence w/attempts to initiate; Supine --> Sit = Total Dependence w/attempts to initiate; Sit --> Supine = Total Dependence w/attempts to initiate

**Sitting Balance** Static Sitting = Fair-; Dynamic Sitting = Poor+

**Standing Balance** Static Standing = DNT; Dynamic Standing = DNT
